to another AWS region, you will need to manually copy the certificates and keys to the new region. Update the Amazon Machine Learning Domain ARN and IAM Role The Kinesis Firehose Action Group needs an ARN to authorize the IAM role for the Amazon S3 Events Destination stream that receives data from Amazon Kinesis Firehose. Also, you must specify the ARN of the Kinesis Firehose domain. The Kinesis Firehose Action Group, a policy, and an IAM role to authorize the Kinesis Firehose Action Group are added to the stack to ensure that AWS Lambda can access the Kinesis Firehose IAM role to create the output S3 file. Create a Kinesis Data Firehose Action Group The Amazon Kinesis Firehose Action Group enables Kinesis Data Firehose to create a Kinesis Firehose Data Delivery Stream that delivers data from the Kinesis Firehose event destination to the Kinesis Data Firehose S3 output destination. You can also use the Kinesis Data Firehose Action Group to enable Kinesis Data Firehose to create a Kinesis Data Firehose Data Delivery Stream that delivers data from the Kinesis Firehose event destination to the Kinesis Data Firehose S3 Output Destination. For more information, see Create a Kinesis Data Firehose Action Group. As a prerequisite, you must first create the Kinesis Data Firehose destination. To learn how to create a Kinesis Data Firehose destination, see Create a Kinesis Data Firehose Destination. When you create a Kinesis Data Firehose Action Group, you must also specify the IAM Role to authorize the AWS Lambda function to access the destination for the data delivery. To learn how to authorize your Lambda function to access the destination, see Authorize AWS Lambda Function to Access a Kinesis Firehose Destination. In the AWS Management Console, choose Data | Amazon Kinesis Data Firehose to open the Amazon Kinesis Data Firehose console. Choose Create Data Firehose Action Group to open the Create Data Firehose Action Group console. For information about the parameters of the Create Data Firehose Action Group, see Create a Kinesis Data Firehose Action Group. To ensure 82157476af
